VIRTUAL PROJECT UPDATE

The project information can be accessed anytime, anywhere beginning 12 p.m. (EDT), Tuesday, June 8, 2021

Maps, drawings, and other information will be available on the project website:

nwflroads.com/virtualmeetings

Scan me

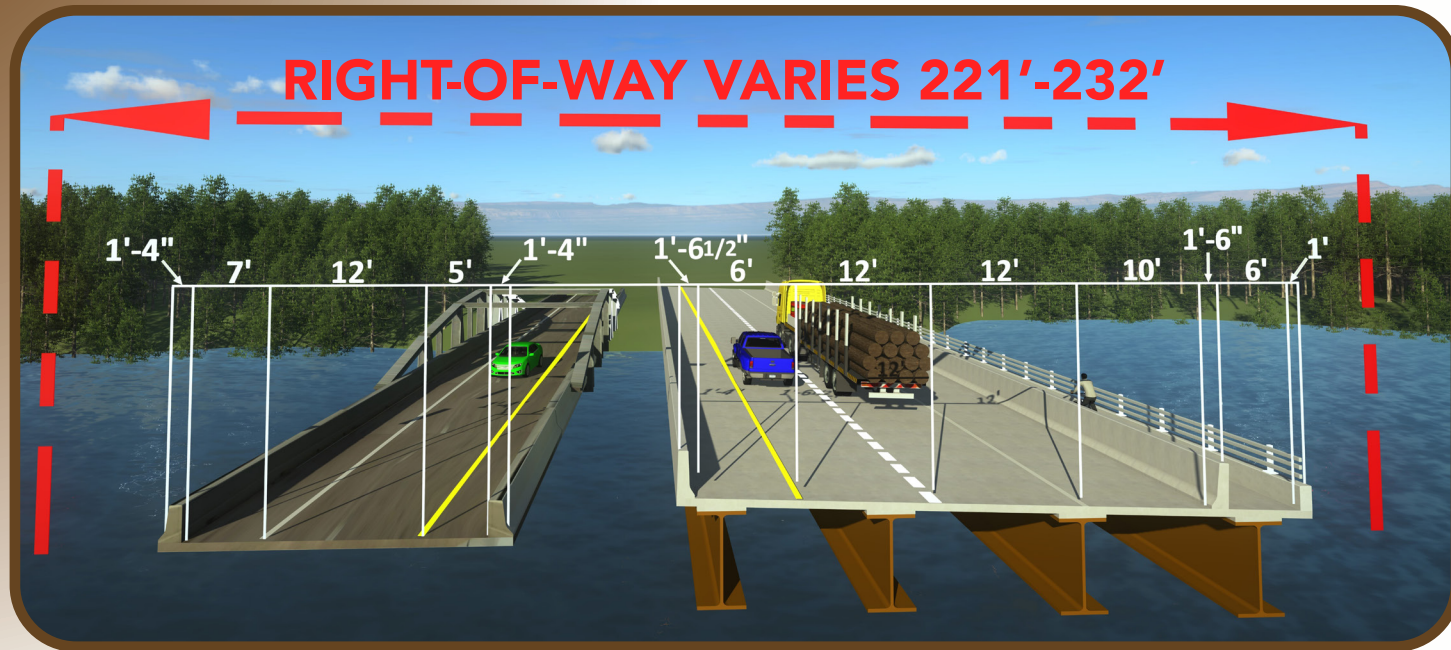

The Florida Department of Transportation (FDOT) is conducting a Project Development and Environment (PD&E) Study to evaluate multiple alternatives relative to the future of the Westbound Old Trammell Bridge and how these alternatives will impact motor vehicle and navigation activities along the project area, as well as identify how the bridge provides service to the local community area.

FDOT has new information concerning the above-referenced project available online at nwflroads.com/virtualmeetings. This information provides interested persons an opportunity to express their views concerning the proposed alternatives.

WHAT IS A PD&E STUDY?

A PD&E Study is the formal process to develop and compare alternatives and determine a preferred action that meets project goals, while minimizing impacts to the social, natural, and physical environments. Engaging the public by sharing and receiving information is a key component of this process and required by the National Environmental Policy Act.

TYPICAL SECTION

ALTERNATIVES

No Build Alternative: Consists of leaving the Westbound Old Trammel Bridge in place, continuing the current roadway configuration, and conducting routine inspections until the bridge is phased out at the end of its serviceable life.

Build Alternative 1: Consists of leaving the Westbound Old Trammel Bridge in place but taking the bridge out of service. The existing eastbound bridge will be converted into one travel lane in each direction, the roadway and existing stormwater drainage systems will be modified, and a sidewalk will be constructed within the southern right-of-way (ROW) from the existing eastbound bridge to Bristol.

Build Alternative 2: Consists of removing the Westbound Old Trammel Bridge and converting the existing eastbound bridge into one travel lane in each direction. The bridge approaches for Westbound Old Trammel Bridge will be removed, stormwater drainage systems will be improved, and a sidewalk will be constructed within the southern ROW from the existing eastbound bridge to Bristol.

PROJECT IMPACTS

Evaluation Criteria	No-Build Alternative	Build Alternative One	Build Alternative Two
Social and Economic Effects			
ROW Impacts	0	0	0
Roadway: Area of ROW anticipated to be acquired (acres)	0	0	0
Drainage: Off-site ponds necessary (Yes/No)	No	No	No
Drainage: Area of ROW anticipated to be acquired (acres)	0	0	0
Residential Relocations	0	0	0
Business Relocations	0	0	0
Total Relocations	0	0	0
Impacts to Public Use Recreation Areas	None	None	Minimal
Cultural Resource Effects			
Historically Significant Sites Impacted	None	None	High
Archaeological Sites Impacted	None	None	None
National Register of Historic Places Eligible Properties Impacted	None	None	High
Natural Resource Effects			
Wetlands Impacted (acres)	None	None	16.64
Floodplains Impacted (acres)	None	None	None
Impacts to Threatened or Endangered Species	None	None	High
Physical Resource Effects			
Noise Sensitive Sites Potentially Impacted	N/A	N/A	N/A
Contaminated Sites Potentially Impacted	None	None	High
Air Quality Impacts	None	None	None
Water Quality Impacts	None	None	Minimal
Impacts to Existing Utilities	None	None	Minimal
Cost Estimate (\$ Million)			
Engineering and Construction	\$2.1	\$4.6	\$24

Title VI Compliance

The Florida Department of Transportation complies with various non-discrimination laws and regulations, including Title VI of the Civil Rights Act of 1964 and related amendments.

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status.

Persons wishing to express concerns about Title VI may do so by contacting:

WHAT IS A PD&E STUDY?

A PD&E Study is the formal process to develop and compare alternatives and determine a preferred action that meets project goals, while minimizing impacts to the social, natural, and physical environments. Engaging the public by sharing and receiving information is a key component of this process and required by the National Environmental Policy Act.

PURPOSE

The westbound Trammell Bridge, constructed in 1938, is nearing the end of its useful service life and is considered functionally obsolete by the FDOT. The purpose of the project is to evaluate multiple alternatives relative to the future of this bridge while continuing to provide safe and efficient travel to motor vehicles and navigation activities throughout the project area, and to identify how the bridge's function provides service to the local community area.

NEED

This project is needed due to the fact that the existing westbound span is considered functionally obsolete by FDOT.

WORKSHOP ANNOUNCEMENT

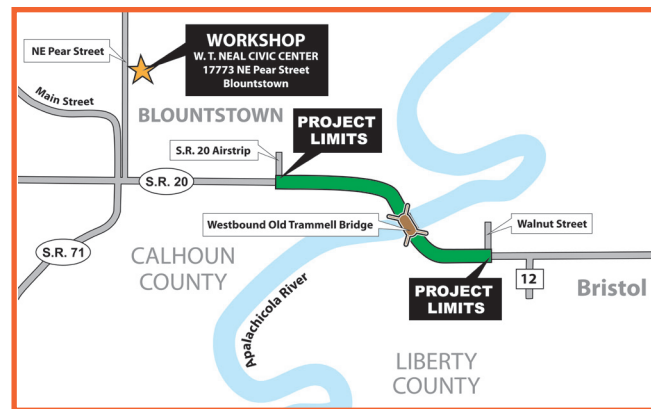

The Florida Department of Transportation (FDOT) invites you to attend

a workshop for the State Road 20 Apalachicola River Bridge (Westbound Old Trammell Bridge) Project Development and Environment (PD&E) Study.

The workshop is being held to provide an opportunity for Calhoun County, Liberty County, City of Blountstown, City of Bristol officials and key staff, Calhoun and Liberty counties Chambers of Commerce, Apalachee Regional Planning Council, and the Calhoun Liberty Hospital to discuss the westbound old Trammell Bridge. This workshop is open to the public.

The purpose of the study is to evaluate multiple alternatives relative to the westbound old Trammell Bridge and how these alternatives will impact motor vehicle and navigation activities along the project area, as well as identify how the bridge's function provides service to the local community.

PUBLIC MEETING ANNOUNCEMENT

The Florida Department of Transportation (FDOT) invites you to attend a public meeting for the State Road 20 Apalachicola River Bridge (Trammell) Project Development and Environment (PD&E) Study. The meeting will be held Thursday, Feb. 21, 2019 at Veteran's Memorial Civic Center, 10405 Northwest Theo Jacobs Way, Bristol. The meeting is from 5:30 p.m. to 6:30 p.m. EST. FDOT representatives will be available to discuss proposed improvements, answer questions, and receive comments.

This meeting is being held to provide interested persons an opportunity to express their views concerning the proposed improvements. The intent of this study is to evaluate multiple alternatives relative to the future of the westbound old Trammell Bridge and how these alternatives will impact motor vehicle and navigation activities along the project area, as well as identify how the bridge's function provides service to the local community area.

Information depicting the proposed improvements will be available on the project website (nwflroads.com).
